

War in Heaven

*An adaptation of the George Gershwin's "Cheek to Cheek"
written and performed by Lynda Williams for the Symposium 2001: Highlighting Student and
Postdoctoral Research, Los Alamos National Laboratory*

Heaven, War in Heaven
Gonna build a missile shield in outer space
to protect us from evil rogue states
even if it starts a new hi tech arms race!

Which we'll win cuz we're entitled
to control and dominate.
And you know no one else is half as rich
to keep up with our spending rate!

And you know we're so much better
at building bombs than building peace
so forget that silly NPT
and wimpy diplomacy!

NMD! Oh what a technical thrill!
The Kill Vehicles!
Space Lasers give me the chills!

For Heaven, War in Heaven!
And we won't be stopped by the ABM Treaty!
As old and out of date as history!

"Maters of Space"
is our Manifest Destiny!!!
